Aa	Film field vs ground	Film glyph and badge	8.49:1	Pass 3:1

Film vs Place vs Anime, side by side

Film | **Place** | **Anime**

Film (lavender) vs Place (sky): ΔE76 38.5, hue gap 51°
Film (lavender) vs Anime (pink): ΔE76 36.0, hue gap 46°
Place (sky) vs Anime (pink): ΔE76 57.2, hue gap 97°
All three are light pastels (similar lightness), so hue carries the difference. Each type also has its own glyph shape and word label, so colour is never the only signal.
